

# New England Thinstones

REAL STONE • REAL THIN • REAL SIMPLE

Discover the beauty of genuine New England Thinstone in a selection of patterns, colors and cuts.

# Authentically New England

**NATURALLY  
BEAUTIFUL**

**Bring Your Vision to Life.** There's something unique about the character and quality of New England stone. Now, thanks to the innovators at New England Thinstones, you can bring the distinctive beauty of New England stone to your home with our natural Thinstone veneer. Whether you're a homeowner, an architect, a builder, or a contractor, we'll help you realize your vision....creatively and naturally. Our natural Thinstone veneer is genuine New England stone, harvested from mountains, fields, woodlands, and quarries. Depending upon how it is cut, our Thinstone offers a variety of unique looks and characteristics, ranging from rustic to refined.

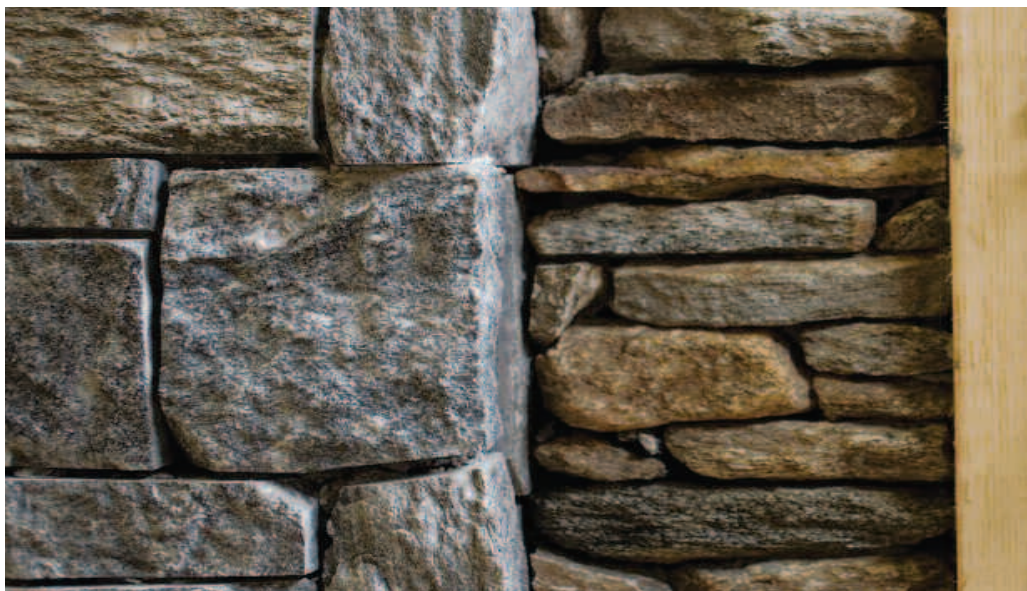

At New England Thinstones, we know stone: how to cut it, how to work with it, how to help customers bring their ideas to life. Our Thinstone is perfectly suited to a wide array of interior and exterior applications. From fireplaces and facades to walls and wine cellars, inspired design solutions are both achievable and affordable. Our Thinstone is durable and naturally suited to any climate conditions.

Timeless Beauty. Enduring Style. Character and quality. This is what makes our Thinstone distinctive.

From fieldstone, weathered over 200 years, to smooth river rounds harvested from gravel banks along Connecticut's shoreline, we look for a variety of organic colors, dramatic textures and distinctive patterns to provide a multitude of options.

New England Thinstones carefully selects each stone for color and pattern. To further ensure superior quality, we pick our stones by hand to preserve their natural patina and inherent beauty. Then each is cut with custom Thinstone saws operated by highly trained master craftsmen. Any stone not meeting our standards is rejected.

Thinstone is 100% natural stone. Shade and color variations are to be expected.

## Easy. Efficient. Economical.

As innovative as it is beautiful, our Thinstone is remarkably easy to work with. It comes ready to use; some additional cutting or finishing may be required. And because its profile measures just 3/4" to 1 1/4", it effectively provides up to five times the coverage of traditional 4" to 6" stone veneer of equivalent weight, with no footing requirements. Yet another benefit: thinner stone is significantly lighter and easier to handle, resulting in faster installation and reduced labor costs.

## In Stock & In Control

When you're ready to build, we're ready to ship. We maintain a large inventory of every standard item so you can expect quick turnaround on your order. We specialize in custom work; each order is processed in a timely manner as we have the unique ability to control all aspects of the process - from procurement of the stone, to quality control and fulfillment, to delivery of the finished product via our own fleet of specialty trucks.

Best of all, long-distance shipping is more efficient because our product is thin by nature, enabling us to bring the warmth of authentic New England stone to all corners of the country.

## Packaging

**Flats:** 200 sq. ft./pallet • 100 sq. ft./pallet  
50 sq. ft./pallet • 8 sq. ft./box/tote

**Corners:** 50 linear ft./pallet  
8 linear ft./box/tote

## Green Totes - An Industry First!

New England Thinstones is proud to introduce earth-friendly packaging to an industry that owes everything to Mother Nature. Our new recyclable totes come in two distinctive colors: flats are packaged in grey and corners in red.
